Fire Protection Requirements for Powerplant Installations on Transport
Category Airplanes

Gentlemen:

The cognizant committee of the Aerospace Industries Association has reviewed the subject document and offers the following comment.

The subject NPRM provides notice for comment on the intent of the FAA to adopt paragraph (c) of JAR 25.1183 into FAR 25.1183 thus harmonizing the two requirements. The addition of this paragraph is seen as being redundant as other requirements cover the points made in this particular paragraph. The FAA concedes this point. However the change does not appear to create any additional hardship on applicants other than the potential for repeated documentation.

Joseph Dauksys
Director Engineering & Certification
